I CLAIM:

5

- 1. A new and distinct *Ilex x koehneana* plant having the following combination of characteristics:
 - (a) displays a moderate to fast growing upright moderately narrow pyramidal growth habit,
 - (b) forms in abundance showy red fruit that commonly is retained on the plant well into February,
 - (c) displays improved cold hardiness, and
- (d) displays good drought tolerance in established plantings; substantially as shown and described.
